Education

St. Vincent Pallotti College of Engineering and Technology

Nagpur, India

B.Tech, Computer Science and Business Systems CGPA: 9.6 / 10

Aug 2023 – May 2027

• Relevant Coursework: Machine Learning, Computer Vision, NLP, Data Structures & Algorithms, DBMS

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, C++, C

AI / ML & Computer Vision: Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, OCR, OpenCV, PyTorch, Sentence-Transformers

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS **Backend:** Node.js, Express.js, FastAPI, REST API

Databases & Cloud: MongoDB, PostgreSQL, SQL Server, ChromaDB, Google Cloud Platform, Supabase

DevOps & Tools: Docker, Git, GitHub, Vercel, Postman, VS Code

Experience

Web Developer Intern

Jun 2025 – Jan 2026

Trust Fintech

Hybrid

- Built a production-grade full-stack KYC module — React frontend, RESTful API backend, and SQL Server database — enabling compliant digital onboarding for fintech customers.
- Developed a real-time face authentication system using **OpenCV** and computer vision, integrated into the KYC pipeline to automate identity verification and reduce manual review time.
- Designed and optimised SQL Server schemas and indexing strategies for KYC document storage and audit trails, ensuring fast retrieval and regulatory data integrity.

Projects

GraphRAG Benchmark | *Python, FastAPI, React.js, TigerGraph, FAISS, Gemini 2.0 Flash* | [GitHub](#) | [Live](#)

2025

- Benchmarked LLM-Only, Basic RAG, and GraphRAG pipelines across **100,850 Wikipedia articles**, achieving **90% accuracy** with an **84% token reduction** over the LLM-only baseline.
- Integrated TigerGraph Savanna as the knowledge graph backend and FAISS for vector search; exposed via FastAPI and a React.js dashboard on Vercel. Submitted at **TigerGraph + Google AI Hackathon**.

SkinGuard – AI Skincare Ingredient Analyser | *Python, FastAPI, PostgreSQL, OpenCV, Docker, JS* | [GitHub](#) | [Live](#)

2025

- Built an AI web app for skincare ingredient analysis via label-image OCR, barcode scan, or manual input; integrated a knowledge base of **26,058 ingredient records** (25,775 EU CosIng + 283 safety profiles) for personalised risk assessment.
- Implemented OpenCV-based OCR extraction and automated ingredient classification pipeline; containerised with **Docker** for consistent deployment across environments.

BIS Compliance Recommendation Engine | *Python, ChromaDB, Sentence-Transformers, Streamlit* | [GitHub](#) | [Live](#)

2024

- Built a semantic search system recommending relevant BIS standards by combining keyword and vector-based (Sentence-Transformers + ChromaDB) retrieval; developed an end-to-end document ingestion pipeline exposed via Streamlit UI and REST APIs.

Awards & Achievements

1st Runner-Up – NASA Space Apps Challenge 2024 (Global Hackathon)

Top 10 Finalist – Raccoon AI Innovation Challenge, National Institute of Technology (NIT) Rourkela

Top 10 Finalist – GraphRAG TigerGraph Savana Hackathon 2026

Promotion Head, Hackronyx 2025 – Led outreach for a national-level hackathon; drove participation from **3,500+ students** across India

Certifications

Advanced Course on Green Skills and Artificial Intelligence – Edunet Foundation, AICTE & Shell | 2026

Introduction to Machine Learning – Great Learning

Computer Vision – Great Learning

Deep Learning Fundamentals – Simplilearn
