Objective

Final-year Computer Science student with hands-on experience in full-stack development, data engineering, REST API integration, and AI-powered pipeline design. Proficient in Python, SQL, ETL workflows, and cloud fundamentals. Seeking a Data/Cloud Intern role to contribute to real-world data pipelines, cloud integrations, and backend automation.

EDUCATION

St. Vincent Pallotti College of Engineering and Technology

Aug 2023 – Present

B.Tech, Computer Science and Business Systems

CGPA: 9.6 / 10

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL, HTML5, CSS3
- **Data & Backend:** REST APIs, JSON, ETL Concepts, Data Processing, Data Cleaning & Validation, Web Scraping, Process Automation
- **Libraries & Frameworks:** Pandas, NumPy, OpenCV, Scikit-learn, Flask, FastAPI
- **Cloud & Database:** AWS (Basic), GCP (Basic), PostgreSQL, SQLite, Docker
- **Developer Tools:** Git, GitHub, CLI/Bash, Postman, Jupyter Notebook, VS Code
- **Core Computer Science:** Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Collaboration, Communication, Quick Learner

EXPERIENCE

Web Developer Intern – Trust Fintech

Jun 2025 – Jan 2026

- Built a full-stack KYC module end-to-end — frontend in Visual Studio (.NET), RESTful API backend, and SQL Server database — enabling compliant customer onboarding for a fintech platform
- Developed a face authentication system using OpenCV-based computer vision for real-time identity verification, integrated into the KYC pipeline to automate and secure user onboarding
- Designed and optimized SQL Server schemas and queries for KYC document storage, user records, and audit trails, ensuring fast retrieval and data integrity

PROJECTS

SkinGuard – AI-Powered Skincare Ingredient Analyzer

- Developed an AI-powered web application that analyzes skincare product ingredients through label images, barcode scans, or manual input.
- Integrated external REST APIs and processed JSON data to retrieve product and ingredient information.
- Built backend services using FastAPI and PostgreSQL for ingredient processing and personalized safety assessment.
- Implemented OCR-based text extraction and automated data processing workflows for ingredient analysis.

Tech Stack: Python, FastAPI, PostgreSQL, REST APIs, JSON, OpenCV, Docker, HTML, CSS, JavaScript

BIS Compliance Recommendation Engine

- Built an intelligent search system that recommends relevant BIS standards based on product descriptions.
- Developed a data ingestion and processing pipeline for extracting and organizing information from standard documents.
- Implemented semantic search and exposed recommendations through REST APIs and a user-friendly interface.
- Improved information retrieval by combining keyword matching with vector-based search techniques.

Tech Stack: Python, REST APIs, JSON, ChromaDB, Sentence-Transformers, Streamlit

LEADERSHIP & ACTIVITIES

- **Promotion Head, Hackronyx (2025)** — Led outreach and marketing for a national-level hackathon, driving participation from **3,500+** students across India

AWARDS & ACHIEVEMENTS

- **1st Runner-Up** – NASA Space Apps Challenge 2024.

CERTIFICATIONS

- Advanced Course on Green Skills and Artificial Intelligence – Edunet Foundation, AICTE & Shell (Skills4Future Program) | 2026
- Introduction to Machine Learning – Great Learning
- Computer Vision – Great Learning
- Deep Learning Fundamentals – Simplilearn
